

# TERRALAM<sup>®</sup> EPZ GROUNDING MATS

Improve Your On-Site Safety

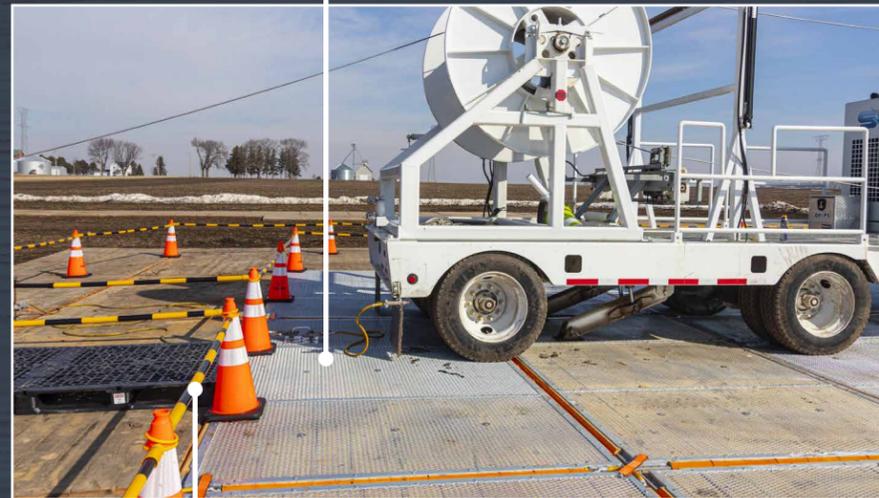

**STERLING**

# PROTECT YOUR CREW FROM ELECTRICAL HAZARDS

For crews pulling wire, building substations, or handling other high-risk applications, TerraLam® EPZ Grounding Mats are a highly reliable option to keep electric utility workers safe. Independently tested to electrical utility standards, TerraLam EPZ Grounding Mats eliminate the differences in electric potential that can cause shock by creating a grounded, equipotential work zone.

## FAST, EFFICIENT INSTALLATION OF MATS AND CABLES

### BUFFER ZONE

Guides workers away from unsafe areas outside the equipotential zone — optional but recommended

## TESTED FOR PERFORMANCE AND RELIABILITY BY KEMA

An independent, inspection and certification organization

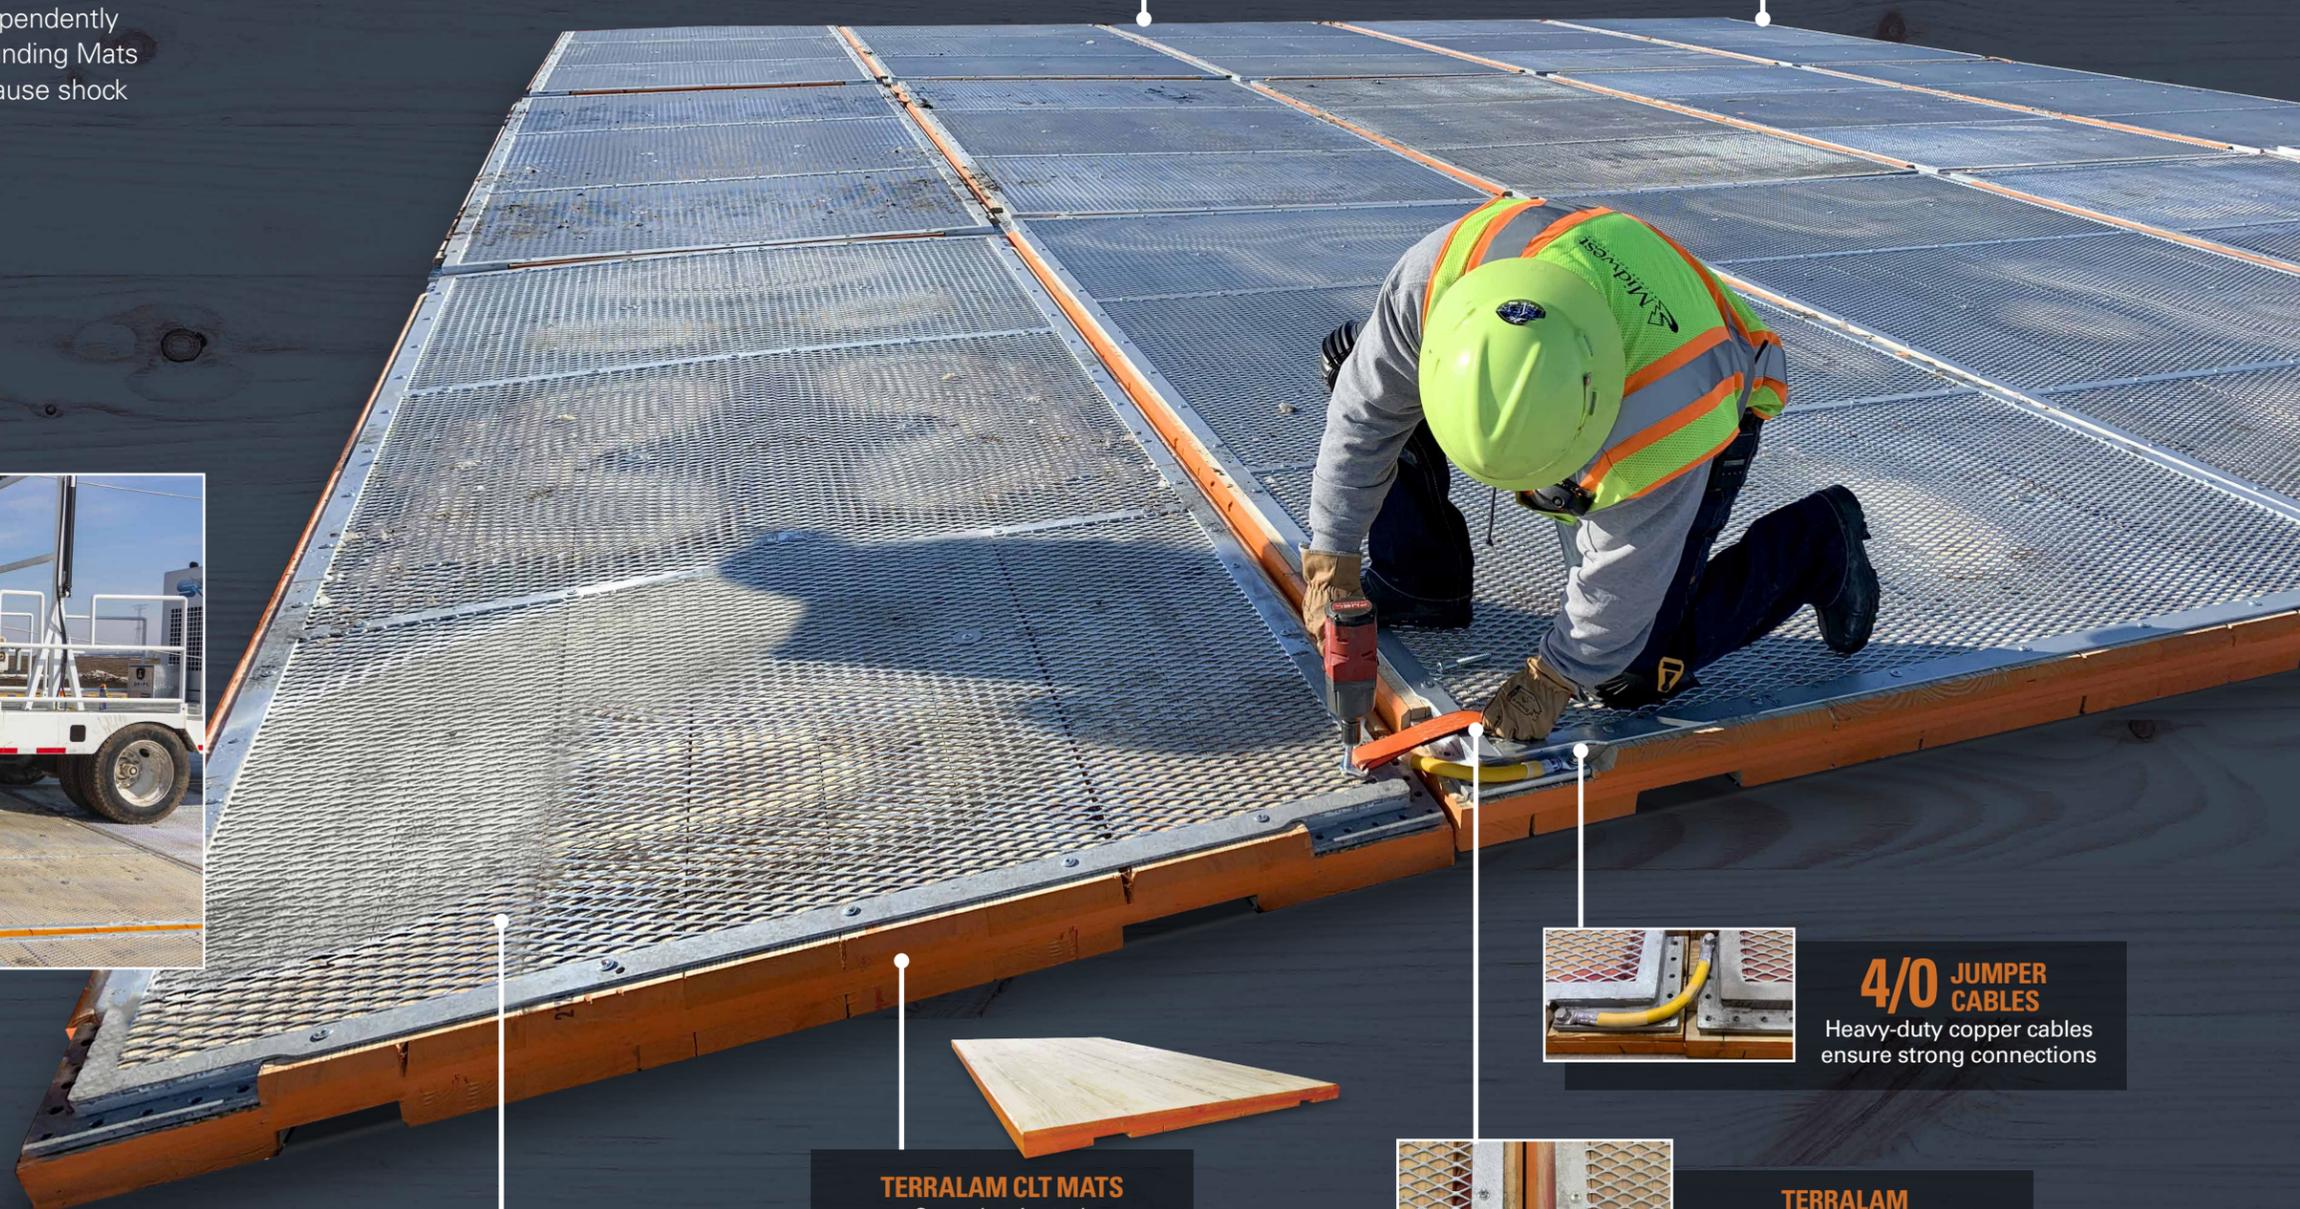

### RECESSED CORNER CONNECTION PLATES

Protects connections and provides versatile configuration

### VERSATILE BUS BARS

Easily secures anywhere on the mat and provides convenient connection to equipment or grounding rods

### TERRALAM CLT MATS

Cross-laminated, engineered product provides strength and stability

### 4/0 JUMPER CABLES

Heavy-duty copper cables ensure strong connections

### TERRALAM CONNECT SYSTEM

Sturdy, polyester straps and screws create an interlocking work surface for minimal movement or separation
