

TERRACROSS™

An Engineered Solution for Safer, Easier Site Crossing

STERLING

CROSS EFFICIENTLY WITHOUT SACRIFICING SAFETY

Move your crews and equipment across ditches, water, and other hazards quickly and safely with TerraCross™ by Sterling. A safer alternative to field bridging, TerraCross is a fully engineered system made with structural steel that can be installed with matting equipment you have on site. TerraCross works with TerraLam® 700 CLT mats to reliably support up to 100 tons.

Our TerraCross systems receive a **26-POINT SAFETY INSPECTION** before shipping, and we maintain each one to always meet our high engineering standards.

DELIVERED ON A SINGLE TRUCK (TERRACROSS 40)
and quick to deploy

MODEL	CAPACITY (TONS)	CLEAR SPAN	BRIDGE LENGTH
TERRACROSS™ 40	100	35'	40'
TERRACROSS™ 56	65	50'	56'

TERRALAM® 700 CLT MATS
provide the support and travel surface for the bridge

OSHA-COMPLIANT
handrails pinned to bridge

4 STRUCTURAL STEEL WELDMENTS
provide the backbone for the TerraCross

Engineered and pre-drilled TerraLam® 500 bearing mat makes for **EASY INSTALLATION**

GEOTEXTILE COMPATIBLE
helps keep debris from leaving bridge and entering waterway

ABOUT STERLING

Sterling is a leading provider of innovative site access solutions for companies that build our nation's energy infrastructure. We are America's largest manufacturer of CLT (cross-laminated timber) site access mats. Our TerraLam® CLT is an engineered matting solution that saves time and money, protects the environment, and ensures worker safety. TerraLam is manufactured on state-of-the-art automated equipment at our Illinois and Texas facilities for maximum consistency and quality. Our innovative matting products, combined with expert consultation and an array of turnkey services, deliver exceptional value on any size project and lay the groundwork for your success.
